5224

# THE ELECTRICAL WORLD

A REVIEW OF CURRENT PROGRESS IN ELECTRICITY
AND ITS PRACTICAL APPLICATIONS

## VOLUME XLVIII

JULY 7 to DECEMBER 29, 1906

NEW YORK:
ELECTRICAL WORLD

# INDEX TO VOLUME XLVIII.

## GENERAL INDEX.

*Entries from the Digest of Current Electrical Literature are indicated by D (Digest) and D R (Digest Reference).*

### A

Accidents, Electrical. By Rain, (D.) 378
Acetylene, Ascetic aspect of, 360
Adirondacks, Forest destruction, 597
Advance Electric Co., 57
Advertising, Money wasted in, 832
——(See also Central station business.)
Advertising exhibition at Atlantic City. By Rae, Jr., *44
Afterglow. By Trowbridge, (D.) 879
Air compressors, Electrically driven. By Thompson, (D.) 142
Ajax Line Material Co., 538, 815
Alcohol, Denatured, 168, 949
Alcohol as a fuel, 1
Allis-Chalmers Co., *969
Alloys:
——Electrical resistance of. By Willows, (D.) 1251
——Hensler. By Take, (D.) 1072
Alternating-current instruments, (D. R.) 338
Alternating currents:
——Measuring weak currents. By Toenig, (D.) 1161
——Real and magnetizing power. By Boucherot, (D. R.) 1252
——Rectification of, 355
——Theory. By Perret, (D.) 534
——Wave form device. By Brackett, (D.) *1252
Alternators:
——Changing frequency of. By Cox, 426
——Classification of. By Fynn, (D.) 47, (D. R.) 98
——Compounding alternators. By Roth, (D.) *534
——Commutator motors. By Jacquin, (D.) 534
——Construction, performance and operation. By Lincoln, (D.) 876, 1004
——Higher harmonics. By Simons, (D). 180
——"Image current" alternators. By Faccioli, 75, *94
——Kelsey induction, *609
——Lowering the frequency. By Buchenberg, 647
——Oerlikon turbo-alternators. By Legros, (D. R.) 336
——Output coefficients. By Hobart and Ellis, (D. R.) 1207
——Parallel operation of. By Fleschmann, (D.) 720
——Performance and operation of. By Lincoln, (D.) 1250
——Preventing sparking, 276
——Relation of the alternating-current motor to central station business. By Lloyd, 672
——Rushmore induction, *610
——Self-exciting, low-frequency. By Faccioli, *525, *1238
——Seyfert double-wound commutating motor, *1187
——Short circuiting of. By Punga, (D). 572
——Testing method, Behrend, *1111
——Theory of. By Sumec, (D. R.) 534
——Variation of frequency, Effect of, on output, 201
——Western Electric, *537
Aluminum, Welding. By Herkenrath, (D.) 677
Aluminum rectifier, Andrews, 950
American Association for the Advancement of Science, 7
American Ball Engine Co., 256
American Diesel Engine Co., 102
American Electrochemical Society, New York meeting, 702
American Institute of Electrical Engineers:
——Boston Branch, 1230
——November meeting, 1029
——October meeting, 836
——September meeting, 635
——Schenectady meetings, 512, 793
——Trip to Europe, 162
——University of Illinois meeting, 1143
American Instrument Co., 146
American Society of Mechanical Engineers, 9, 1142
American Society for Testing Materials, 77
American Spiral Pipe Works, *1209
American Steam Gauge & Valve Mfg. Co., 56
American Street Railway Association, 698, 741, 749, 785, 788, 791
Ammeters:
——D'Arsonval, *679
——Kelvin sector. By Rypinski, (D.) 880
——On exciter circuits. By Ryan, *36
Ammonia production, 1230
Amsterdam Exposition, 1145
Anemometer, Electrical. By Goldschmidt, (D.) 880
Annealing and hardening furnace. By Cohn, (D. R.) 494; (D.) 1161
Apology to readers of the Electrical World, 1181
Apprentices in machine factories, 944
Aqueous solutions, Molecular constitution of. By Sutherland, (D.) 144
Arc lamp carbon ends, (D.) 535
Arc lamps:
——Automatic, Construction of. By Tomlinson and Johnston, (D.) 48
——Changes in operation of, 431
——Differential lamps. By Foulhouze and Guedeney, (D. R.) 247, 293
——Flaming arcs. By Blondel, *286; (D.) 336
Carbone long-flame. By Andrews, 551, (D.) 573
Luminous efficiency, 57, (D.) 534
Arc lamps: (Continued.)
"Snowball," 448
Stanley-G. I. "Brilliant," 539
——Low vs. high voltage. By Roberts, 675
——Magnet coils for, 128
——Marquette, *341
——Progress in lamps, 489
——Regulation of, 37
——Rope for operation of, 235
——Series luminous arc and rectifier system, *531
——Status of the arc, 2
——Wave form, Influence of, on operation of lamp. By Zorawski, (D.) *142
Arc lighting, Municipal. By Davidson (D.) 1070
Arch, Electrical, at Denver, *46, *121
Archer Daniels Linseed Co., 576
Armature conductors, Predetermination of the length of. By Winetraub, 371
Armatures:
——Drying out. By Fischer, 36
——Magneto test for grounded, 431
——Pressing on. By Sinclair, (D. R.), 1250
——Series-parallel windings, with equipotential connections. By Arnold, 88, 117, 130
——Testing, for short circuits, 1064
——Toothed, Lines of magnetic flux. By Mueller, (D. R.) 1160
Arnold, B. J., 1232
Ash conveyor, *1236
Asia Minor, Electricity in, 700
Association of German Electrical Engineers, (D. R.) 101, 183
Atlantic City railway accident, 837
Atmosphere, Electric field of the. By Nordmann, (D.) 101
Atomic conductivities of ions. By Blackman, (D.) 378
Automatic Electric Co., 339
Automobile Club of America, 1144, 1168
Automobiles:
——Berlin electric cabs, (D.) 676
——Electric. By Sieg, (D.) 1005
——Foreign cars, *480
——Gasoline-electric motor truck, *808
——Locomobiles. By Heilmann, (D.) 293
——Omnibus competition with tramways. By Meyer, (D. R.) 182
——Omnibuses abroad, 631
——Operating costs in German and English practice. By Vellguth, (D.) 1119
——Petrol-electric, (D.) 442
——Portable charging station, *251
——Russian Emperor's car, 81
——Storage battery cells, Size and voltage of. By Rae, 1151

### B

Ball bearings:
——Application of, to motor shafts, *884
——Hess-Bright, *1078
Baltimore, Maps of, 409
Bath Portland Cement Co., Electrical equipment, *966
Batteries:
——Battery for electrostatic measurements. By Herweg, (D.) 771
——Constancy of batteries giving currents. By White, (D.) *965
——Creeping, Causes of, 1064
——Decker. By Crocker, *724
——(See also Storage batteries.)
Bavarian Jubilee Exposition, (D.) 338
Bearings, Turbo-generator. By Niethammer, (D. R.) 720
Beggs, J. I., *788
Beit bequests, 166
Bell wiring. By Cook, 233; O'Donnell, Trambley, *428; Jones, *429
Belts, Removing oil from, 37
Benjamin Electric Mfg. Co., 931, 1123
Bismuth, Resistance of, 37
Bissell, F., Co., 539
Black Sand & Gold Recovery Co., 1026
Blast furnace gas for power purposes, (D.) 493, 721
Blast furnaces. By Richards, (D. R.) 145
Blasting apparatus, Electric. By Maurice, (D. R.) 50, 101, 183, 338
Bleaching flour, (D.) 49
Bleaching liquor. By Biggs, (D.) 1161
Bliss, E. W., & Co., 1079
Blowers, Electrically driven high-pressure, *1080
Blue printing apparatus, *888
Bohemian hydro-electric plant. By Koester, *125
Boilers:
——Bavarian Jubilee Exposition, (D. R.) 1160
——Behavior of, when containing too much water. By Malmken, 667
——Burning low-grade fuel. By Hobart, 28
——Coal characteristic as affecting performance with steam boilers, *857
——Combustion, Reduction of rate of, and economical results. By McArthur, 863
——Driving boiler feed pumps. By Gildersleeve, 33
——Economics. By Fitch, 425
——Economy in boiler room. By Griggs, 859
——Efficiency of. By Booth, (D.) 49; Holbrook, 417
——Feed water, Live steam heated. By Wilkinson, (D.) 142
——Feed water and boiler scale, 669
Boilers: (Continued.)
——Feed-water heating. By Strohm, 661, *1057
——Feed-water purification. By Strohm, *423
——Feed-water regulators, *300, *576, *1058
——Feeders, Duplicate. By Smith, *1059
——Induced draft. By Casmey, (D. R.) 1207
——Leaky blow-off valve. By Allen, 1060
——Location of. By Audley, 232; Griggs, 427
——Parson system of burning cheap fuel, *855
——Smoke-proof boiler, *856
——Troubles. By Hobart, 1062
——Water level variations. By Johnson, 866
Bolts, Broken follower. By Johnson, 663
Boltzmann, Ludwig. By Brother Potamian, 701
Book reviews:
——Akkumulatoren. By L. Lucas, 51
——Alternating-current Windings. By C. Kinsbrunner, 880
——Analyse des Métaux par Eléctrolyse. By A. Holland and L. Bertiaux, 51
——Applied Electricity. By J. P. Gorke, 1253
——Art of Generating Gear Teeth. By H. A. Coombs, 444
——Berlin-Zossen Electric Railway Tests, 1253
——Briquettes and Patent Fuel. By P. R. Bjorling, 1074
——Business Telegraph Code, 1074
——Cam Construction. By George Jepson, 145
——Commande a Distance. By Regis Frilley, 296
——Continuous-Current Armatures. By C. Kinsbrunner, 880
——Copper Handbook, 1253
——Designs for Small Dynamos and Motors. By C. P. Poole, 1075
——Electric Machine Design. By H. F. Parshall and H. M. Hobart, 52
——Electric Power Plant. By N. S. Schneider, 51
——Electric Railway Test Commission, 145
——Electric Transmission of Water Power. By A. D. Adams, 445
——Electrical Engineering in Theory and Practice. By G. D. A. Parr, 51
——Electrical Nature of Matter and Radioactivity. By H. C. Jones, 183
——Electro-Technical Series. By E. J. Houston and A. E. Kennelly, 1074
——Elektrische und Magnetische Messomgen und Messinstrumenti. By H. S. Hallo and H. W. Land, 378
——Elements of Electrical Engineering. By W. S. Franklin and W. Esty, 102
——Elettricita e Materia. By J. J. Thomson, 296
——Elettrotecnica. By Guido Grassi, 338
——Energy Chart. By H. R. Sankey, 1253
——Evolution of Weights and Measures and the Metric System, 445
——Experiments of Applied Electricity. By A. J. Rowland and W. B. Creagmile, 445
——Graphical Treatment of the Induction Motor. By A. Heyland, 444
——Hand Book of Bare and Insulated Wires and Cables. By J. W. Marsh, 445
——Industrial Furnaces. By E. Damour, 1253
——Letter of Petrus Peregrimus on the Magnet, 183
——Management of Electrical Machinery. By F. B. Crocker and S. S. Wheeler, 1075
——Manuale dell Engegnere Elettrictista. By A. Marro, 102
——Modern Engineering Library, 1254
——Motive Power and Gearing for Electrical Machinery. By E. T. Carter, 51
——National Electric Light Association, 1209
——Notes on Electrochemistry. By F. G. Wiechmann, 50
——Physics. By C. R. Mann and G. R. Truss, 723
——Polyphase Currents. By Alfred Still, 679
——Poor's Manual of Railroads, 1253
——Populäre Schriften. By L. Boltzmann, 772
——Practical Alternating Currents and Power Transmission. By N. Harrison, 1253
——Practical Laws and Data on the Condensation of Steam in Covered and Bare Pipes. By C. P. Paulding, 1074
——Practical Talks on Electricity. By William Baxter, Jr., 183
——Seven Follies of Science. By John Phin, 378
——Shaft Governors. By W. Trinks and C. Housum, 51
——Stray Currents from Electric Railways. By Carl Michalke, 615
——Theorie und Berechnung Elektrischer Leitungen. By Gallusser and Hausmann, 339
Borings, Removing. By Brown, *667
Boston Edison System, Annual report, 747
Box tool, Garvin, *255
Brakes:
——Car brakes. By Mozley, (D.) 770; Sayers, (D. R.) 770, 812, 1005
——Electromagnetic, for railways. By Parodi, *664
——Magnetic track brake. By Fox, (D.) 612
——Railway systems. By Scholtes and Bjorksgren, (D.) 612
Brazil, Doing business in, 516
Breakdown of electrical machinery, (D.) 926
Bridge, Transporter, at Newport, England, (D. R.) 722
Bridge construction, Electric power in, (D. R.) 612
British Association for the Advancement of Science, 274, 471

*indicates illustrated articles.

157714

Bronzes, Electrolytic precipitation of. By Curry, (D.) 880
Brooklyn Edison power houses, 397
Brush, C. F., and his work, 553
Brush holders. By Schlegel, (D.) 611
——Siegfried & Storer, *79
Brushes:
——Carbon brushes. By Siedek, (D.) 1117
——Investigation of. By Arnold, (D.) 611
——Notes on. By Molnar, (D.) *925
——Setting, on rectifiers of alternators. By Mulford, 862
——Transition resistance. By Salto, (D.) 720
Bryan on ownership, 320, 477
Buffalo Exposition, 1159
Buildings:
——Altman store, Engineering features, 846
——Engineering of University of Pennsylvania, *759, 789, *1237
——Engineering societies, New York, 829, 1021, 1029
Bureau of Standards, 518
Burglar alarms, Window. By Stern, 32

## C

Cable station testing room. By Tabler, (D.) 338
Cables:
——Alaskan submarine cable, 361, 1234
——Aluminum and copper transmission lines. By Kamps, 1250
——Calculation of capacity and heating of underground. By Picou, (D. R.) 183
——Cost of, by Hobart, (D.) 812
——Faults and their localization. By Prohaska, (D. R.) 50; Marsden, 1059
——Formulas for the capacity currents in three-core cables. By Coales and Russell, (D. R.) 1005
——Heating of multiple-core, high-tension, in earth. By Teichmueller and Humann, (D.) 1161
——Heating of. By Teichmueller and Humann, (D.) 100
——High-potential. By Jona, (D.) *1072
——High tension cables at Milan Exposition. By Wilkinson, *93
——New York, Cuba and Colon, 1231
——Ohio River submarine, 682
——Simplon tunnel cables. By Vanoni, (D. R.) 183; (D.) *1121
——Steel, Syracuse line, *137
——Telephone cable, Loaded, (D.) 1162
——Temperature rise of three-phase cables, (D.) 573
——Testing submarine. By Winkfield, (D. R.) 338
——Troubles. By Brooking, (D.) 1161
Cadmium cell. By Hulett, (D.) 614; (D.) 678
Canadian power, 639
Canals, Electric towing. By Koettgen, (D.) 493
——Teltow Canal, Electric equipment of. By Block, (D.) 99
——Germany, *281
Capacities, Comparison of. By Trowbridge and Taylor, (D.) 1208
Carbons, Testing resistance of. By Kuhn, (D.) *296
Carborundum as a wireless telegraph receiver. By Round, 370; De Forest, 491
Carelessness, Troubles due to. By Hobart, 867
Carlisle & Finch Co., 1125
Car circuit-breaker test. By Schlegel, *1061
Car steps, Increased height of, 596
Cars:
——Electric, L. I. R. R., *332
——Gasoline-electric, *379
——Inspection car in Simplon tunnel, (D. R.) 612
——Petrol-electric motor car, (D.) 337
——Regenerative control of. By Raworth, (D.) *1250
——Steel, for Penn. tunnel, 317
——Trackless trolley cars, *479
Caskets, Electricity in manufacture of metallic, *774
Cathode rays, Reflection of. By William, (D.) 294
Cellulose, Inductive capacity of. By Campbell, (D.) 677
Cement plant electrically equipped, Bath, Pa., *966
Central Laboratory Supply Co., 727
Central station business:
——Advertising:
Direct by mail, 871
Foreign language, 245
Good advertising. By Rae, Jr., 236; Seelman, Jr., 237
Grand Rapids, Mich., 874
How not to advertise, 393
Isolated plant advertisement, 1069
New business and advertising. By South, 869
Novel advertisement, *440
Suggestive forms, *674
——Advertising exhibition. By Rae, Jr., *44
——Alternating-current motor's relation to central station business, 672
——Bills, Automatic making out of. By Ritter von Molo, (D. R.) 100
——Building up the day load. By Hodgson, 432
——Commercial co-operation, 747
——Cost of business getting. By Wiltse, 1024, 1065
——Dallas, Texas, 334
——Denver, 124, 1069
——Developing day load for a small station, 1068
——English municipal plants, 3, 8
——Getting new business. By Hammond, (D. R.) 100
——Getting and keeping new business, 488
——Hints on securing new business, 433
——Inspection of consumers' apparatus, 20
Central station business: (Continued.)
——Keene, N. H., 1050
——Meter readers, Report by, 22
——Meter readings per man per day, 22
——Money for advertising purposes, 569
——Omaha, Neb., 873
——Organization and conduct of a new business department. By Seelman, 4, 39; Kennedy, 238; Robb, 435, 670; Jackson, 871; Wiltse, 1024, 1065
——Paying solicitors, 21
——Residence business, 1068
——Rutland, Vt., 1044
——St. Louis, Mo., *289
——St. Paul Gas Light Co., Organization of commercial department, 38
——San Antonio, Texas, 432
——Selling motors and fans, 22
——Small residences as customers, 21
——Soliciting and advertising, 554
——Soliciting scheme at Sheboygan, 1068
——Wiring done by lighting companies, 22, 273
Central stations:
——Adjuncts to the power load, 653
——Baltimore Electric Power Co. By Bibbins, *85
——Belleville, Ill., *1235
——Belton Power Co., Hydro-electric plant of. By Wrigley, *1147
——Binghamton Light, Heat & Power Co., *1033
——Birmingham, England, (D.) 928
——Birmingham, Summer Lane station, *1105
——Brighton, Eng., municipal station, (D.) 99, 249
——Burlington Light & Power Co., *849
——Camden-Atlantic Coast Ry., *911
——Canton, Ohio, Combined lighting and heating system, *221
——Centralia, Ill., Single-phase light and power work, 1101, *1115
——Christiania, Norway, Load factor. By Norberg-Schultz, (D.) 928
——Cleveland, Ohio, Notes, 5, 23
——Columbus city and interurban railway systems, *707
——Combined lighting and railway plants, 510
——Cost of energy. By Hutton, (D.) 1250
——Danbury, Conn., Building up the day load. By Hodgson, 432
——Day load in small towns, 20
——Denver Gas & Electric Co., 246
——Duluth, Minn., the Great Northern Power Co. By Feiker, *171
——Economies. By Holbrook, 390, 417; Bibbins, (D. R.) 878
——Efficiency of generating stations. By Evans, (D.) 962
——Energy losses in distribution systems, 699
——European practice, 792
——France, Electric power development, 1141; By Montpellier, (D.) 1250
——Franklin, N. H., 656
——Galveston, Texas, 419
——Gas driven systems. By Bibbins, (D. R.) 443
Boston Elevated Ry Co., 751
Milwaukee Northern Ry., *679
——Germany, Financial results in small and medium-sized cities. By Dettmar, (D.) 963, 1022
——Germany, at Schwerin, Modern gas plant. By Schirmacher, (D.) 536
——Getting steam for an overloaded station. By Michel, *427
——Gt. Britain, Report on various stations, (D.) 49
——Greenwich, England, 52,000-H.P. plant, *83
——Grinnell, Iowa, 288
——Holyoke, Mass., *519
——Huntingdon, Pa., plants, *1191
——Industrial power problem. By Esson, (D.) 927
——Iowa City, Iowa, 24
——Italy, Upper. By Budan, (D.R.) 2930
——Johannesburg, South Africa, 165
——Kalkaska, Mich., 853
——Keene, N. H., *1050
——Lackawanna Light Co., Scranton, Pa., *641
——Lincoln, Neb., notes, 851
——Load equalizers, electro-chemical processes as, 217
——Load factor. By Norberg-Schultz, (D.) 928
——Management. Question box of N. E. L. A., 20
——Montpelier, Vt., 850
——N. Y. C. R. R., Port Morris, sub-stations and transmission system, *599, *799
——Operation, Discussion on, 649
——Organization of station and line force, 20
——Peabody municipal plant, 597
——Phil., Development of work, 242
——Pittsburg trolleys, 256
——Port Morris, N. Y. C. & H. R. R. R., *599, *799
——Quebec, Canada, 455
——Quincy, Mass., *219
——Relation of company to the public, 21
——Rockland Light & Power Co., *209
——St. Johnsbury, Vt., 851
——St. Louis, Unification plans, 165
——Salisbury, N. C., Developments, 985
——San Antonio, Tex., Performance, 374
——Sherman, Texas, Oil engines, 155, *169, *245
——Small stations:
Financial returns. By Dettmar, (D.) 963, 1022
Lesson of, 25
Small local stations. By Snell, (D.) 249; Forest, 1246
Small town plants, 20
——Southern Power Co. of North Carolina. By Fatton, *921
——Steam turbines, Baltimore, *85
——Supply to tramway systems. By Watson, (D.) 249
Central stations: (Continued.)
——Switzerland, utilizing falls of the Erlenbach. By Bignami, (D.) 927
——Tasmania plant. By Martinek and Lauri, (D.) 336
——Texas syndicate, 81
——Three-phase vs. direct-current. By Suchy, (D.) 963
——Toledo, Ohio, 392, 418
——230-volt and 450-volt three-wire system, 73
——United Electric Light Co., Springfield, Mass., *363
——Ventilation of stations. By Hartmann, (D.) 1072
——Vermont plants, *849
——Waltham Gas Light Co., *843
——Westchester Lighting Co., New Rochelle station, *11
——Western New York & Penn. Traction Co., 204
——Westport station of Consolidated Gas, Electric Light & Power Co., Baltimore, *403
——Wilkesbarre Gas & Elec. Co., *991
——(See also Transmission plants.)
Cement for leather belting. By Furnace, 34
Charging for electric current:
——Boston, 246
——Church rates, 321
——Cleveland, Ohio, 24
——Columbus, Ohio, 313
——France, 1141
——Keene, N. H., 1051
——Ludington, Mich., 1066
——Meters vs. flat rates, 20
——Multiple rate systems in Indiana towns, 1068
——Published schedule of rates, 4
——Rates for lighting from a trolley system, 335
——Regulation of maximum lighting rates, 277
——Residence rate system at Tyler, Texas, 675
Chase-Shawmut Co., 538
Chemical factories, Electricity in, (D.) 1120
Chemistry:
——Development of. By Ostwald, (D. R.) 294
——Organic. By Marie, (D. R.) 614
Chicago Electrical Show, 1234
Chicago Fuse Wire & Mfg. Co., 1008
Chicago passenger traffic, 80
Chicago Pneumatic Tool Co., 147
Chicago subway, 360
Chimney gases, Cleaning. By Davies and Fryer, (D.) 535
Chinese names and telegrams, 514
Chlorate production, Platinized platinum anodes for. By Geibel, (D.) 1208
Circle diagram and induction motor design, 272. By Gray, 284; Still, *1156
Circuit breakers:
——As current indicators. By Chilton, *1060
——Opening on high-tension line, 37
Circuit breaking, Effect of a secondary current on. By Benischke, (D.) 1161
Circulars of inquiry a nuisance, 1
Clark Electric & Mfg. Co., 928
Cleveland Electric Illuminating Co., 23
Clocks, Electric, (D.) *678
Coal:
——Burning cheap fuel, 420, 422, *656
——Burning small anthracite. By Peabody, 422
——Burning soft coal. By Ennis, 1056
——Characteristics of, as affecting performance with steam boilers, *857
——Low-grade, Burning. By Hobart, 28
——Production of U. S., 513
Coal crushing rolls, Motor driven, *340
Coal storage plant, Electric, 134
Coercive force. By Gumlich, (D.) 964
Coffee roaster, Electric, *177
Coherer action. By Weiss, (D.) 337
Coils of bare aluminum wire. By Hopfelt, (D.) 964
——(See also Induction coils.)
Coins, Electroplated, 640
Coke braize, Burning of. By Atwater, *659
Coke ovens, Development of by-product. By Moore, (D. R.) 493
Coke production, 1230
Colloidal solutions, Action of electrolytes on. By Burton, (D.) 1006
Colloids:
——Double refraction in. By Malcolm, (D. R.) 1208
——Properties and utilization, (D. R.) 338
——Use of, in Kugel lamp. By Lottermoser, (D. R.) 535
Colorado Electric Light, Power & Railway Association, 589, 593, 650
Combustion, Reduction of the rate of, and economical results. By McArthur, 863
Commutation in single-phase motors. By Latour, 484
Commutation phenomena, Experiments. By Baily and Cleghorne, 1138, (D.) 1160
Commutators:
——Artificial cooling of. (D.) *768
——Blackening of, 235
Compass, Errors of, on shipboard. By Arldt, (D.) 1161
Compressed gas as an insulator, *1028
Condenser water, Cooling arrangement for. By Bergen, *426
Condensers:
——Effect on power station economy. By Neilson, (D.) 248
——High-tension. By Guilbert, (D.) *1119
——New type of steam condenser, 424
Conductivities of irons, Atomic. By Blackman, (D.) 378
Conductivity and transverse magnetization, 981
Conductivity bridge, Direct-reading. By Appleyard, (D.) *965
Conductivity of air in an electric field. By Ewell, (D.) 964

*indicates illustrated articles.

Conductivity of common metals. By Betts, 914
Conductivity of heat and of electricity. By Reinganum, (D.) 1006
Conductivity of oxides and sulphides. By Koenigsberger and Reichenheim, (D.) 1006
Conductors:
——Discrepancies from Ohm's law. By Brandes, (D.) 1121
——Eddy currents in slot-wound. By Field, *604
——Resistance of, to variable currents. By Brylinski, (D.) 880
——Sodium as conductor in place of copper. By Betts, 901, *914; Crocker, 1116
——Wind pressure on cylindrical. By Bowie, Jr., 591, *606, 767
——(See also Cables; Pole lines; Transmission of electric power.)
Connellsville, Pa., celebration, *515
Contact resistance between carbon and copper, 1138
Controlling device, Selective, for alternating and direct currents, *987
Converters:
——Cascade. By Arnold, (D. R.) 376
——Rotary. By Weiss, (D. R.), 294
——Rotary converter trouble. By Sommer, (D.), 878
Cooking, Electric, Cost, 1025, 1187
Cooling the engine room. By Hobart, 223
Co-operative Electrical Development Association, 906, 1026, 1188
Copper:
——Prices, and effect of, on industries, 596
——Production. By Buerner, (D.) 772
——Resistivity temperature coefficient of. By Gray, 141
Copper industry, 166
Copper plating, 868
Cord grip for sockets and handles, *103
Corporate cleanliness and publicity, 701
Corporations:
——Reconstructing, 1103
——Supervising industrial, 1140
Corrosion of structural steel, 77
Cotton manufacturing, Electricity in, 513
Cranes, Electric, at metallurgical works. By Kolben, (D. R.) 1119
Crank mechanism, Ramsey, *252
Crookes tubes. By Bacon, (D. R.) 722
Cross arms, Metallic support for, *727
Crystallization and the structure of metals. By Ewing, (D.) 494
Cuba, American electrical interests in, 596
Curie scholarships, 1102
Current between parallel plates. By Brown, (D.) 613
Current meter, Hering standard, *793
Current tap, Vetter series, *256

## D

D. & W. Fuse Co., 1166
Dams:
——Holyoke, Mass., *519
——Keokuk, on the Miss. River, 839
Decker primary battery. By Crocker, *724
Denver franchises, 640
Devine, J. P., Co., 54
Diagram of electric wave lengths. By Massie, 330
Dielectrics:
——Imperfect, and resonance. By Benischke, (D.) 337
——Loss in. By Humann, (D.) 879
Discharges, Electric, (D.) 294
Discharges through air. By Cramp and Leethan, (D. R.) 574
Discount systems, Defects in, 271
Diving machine, 754
Doherty, Henry L., 123
D'Olier, Henry, Co., 146
Dredge, James, 515
Dredges, Electric power on. By Cory, (D. R.) 336
Drills:
——Corner, for wireman, *1212
——Duntley portable electric, *147
——Electric air, *684
Dry dock motor pumping plant. By Smith, *331
Dynamo ball bearing, *1078
Dynamos:
——Brushes, Location of, 235
——Compensated direct-current. By Ziehl, 902, (D.) 925
——Constant direct-current. By Rosenberg, 902, *918
——Hopkinson tests. By Cox (D.) 1160
——Interpole machines. By Oelschlaeger, (D.) 534
——Miniature dynamo, *970
——New type, with commutating poles. By Fynn, (D.) *1206
——Operation of shunt dynamos, 431
——Output coefficients. By Hobart and Ellis, (D.) 1004, 1070, (D. R.) 1160, 1207
——Polarity, Testing by means of arc lamp, 868
——Proper generation of dynamo, 431
——Selection and testing of materials for. By Epstein, (D.) 1206
——Shutting down. By Thomas, 232; Griggs, 429
——Theory of compensation and commutation. By Menges, (D. R.) 1250
——Three-wire system. By Klein, (D.) 769
——Troubles with. By James, 234

## E

Earth currents of street railways, Supervision of. By Kohlransch, (D.) 181
Earthenware troughing for cables, *1106
Eddy current losses in laminated iron, 743
Eddy-currents in sheet iron. By Kuehns, (D.) 770
Eddy currents in slot-wound conductor. By Field, *604
Edison Company franchise, 316
Edison Illuminating convention, 356, 472
Electric drive for power plant auxiliaries, 1138
Electric field of the atmosphere. By Nordmann, (D.) 101
Electric portables, *682
Electric smelting of iron ore, (D.) 182
Electric waves:
——Reflection and transmission by grids. By Blake and Fountain, (D.) 813; 983
——Use of Wehnelt interrupter. By Cole, (D. R.) 722
Electrical discharges through air. By Cramp and Leetham, (D.) 770
Electrical engineers in England, 162
Electrical instruments, Precision of, 549
Electrical solicitor's handbook, Prizes for, 1026
Electrical Trades Association of Chicago, 984
Electricity:
——Conductivity of, and of heat. By Reinganum, (D.) 1006
——Cost of making, 869
——Mechanical theory of. By Witte, (D.) 1006
Electricity in houses. By Hillman, (D.) 1005
Electrochemical developments, 139, 375, 922, 960
Electrochemical processes as central station load equalizers, 217
Electrode, Rotating. By Perkin, (D. R.) 182
Electro-decolorization. By Wiechmann, (D. R.) 722
Electro galvanizing, (D. R.) 294
Electrolier and conduit hangers. By Poppe, *30
Electroliers, Costly, 905
Electrolysis:
——From stray currents of tramways. By Congden, (D.) 337
——Gas and water pipes, 718
——German study of, 355
——Iron pipes corroded by stray currents. By Haber and Goldschmidt, (D.) 878
Electrolytes. Fused. By Ashcroft, (D.) 614
Electrolytic detectors. By Armagnat, (D.) 614; Austin, (D.) 722
Electromagnets, Calculation of. By Emde, (D.) 1207
Electrometers, Improvements in, (D.) 614
Electronic theory of matter. By Schott, (D.) 144; Righi, (D. R.) 182; Planck, (D. R.) 1006
Electroscope, Portable, *57
Electrostatic and electromagnetic units. Ratio of. By Lord Rayleigh, (D.) 377
Electrostatic capacity between a vertical metallic cylinder and the ground, Measurement of. By Kennelly and Whiting, 1226, 1239
Electrotyping. By Cowper-Coles, (D. R.) 145, 182
Elevators:
——Alternating-current, 555
——Electric and hydraulic compared. By Bushnell, (D.) 99
——Tests of. By Kammerer, (D.) 442
Elks' convention in Denver, *206
Embossing machine, Electric, *1165
Empire State Gas & Electric Association, 744
Employees:
——Prizes for suggestions from, 555
——Sliding scale division with. By Weighington, 335
——Social life of, 319
Enamel on electrical heating apparatus, 37
Energy, Cost of. By Hutton, (D.) 1250
Engineer-constructor defined, 985
Engineering education, 1230
Engineering, Racial. By Freden, 1249
Engineering societies building, 829, 1021, 1029
Engineering societies, Segregation of foreign. By Fries, 1249
Engineering work, Systematic methods in. By Horsnaill, (D.) 50
Engineers:
——Demand for electrical, 80
——How to become an electrical, 472
Engine room, Cooling. By Hobart, 223
Engines:
——Development in design, 297
——Efficiency of steam plant. By Vignoles, (D.) 200, 248
——Germany, Generation of electrical energy, (D) 49
——Handling, under different conditions. By Downing, 664
——Laying up steam engines. By Jacobs, 425
——Lining a steam-engine. By Wilson, 864
——New, in old plants. By Brown, 231
——Oiling systems for electric engines. By Wakeman, *26
——Repair job, Ingenious. By Bertram, *1061
——Reversing shaft governor engines. By Wakeman, *225
——Selection of a steam engine. By Hubbard, 859
——Skinner, Test of, 57
——Tight and loose main bearings. By Johnson, 430
——vs. steam turbines. By Hawcock, (D.) 877
——(See also Gas engines; Oil engines.)
Engraving machine, Electric. By Brandy, *1164
Erie R. R. shops, Hornell, N. Y., *1075
Exciter circuits, Ammeter on. By Ryan, *35
Exciters, Method of driving. By Hommerley, 34
Exhaust steam, Utilizing. By Rubricus, (D. R.) 99
"Expected which did not happen." By Hobart, 667
Explosives and electricity. By Joslin, 1062
Export trade, 73, 199, 271

## F

Factory, Electricity in, 576
Fan motors, Operation of, 669
Fans, Electric, Air deflector for, *146
Farms, Electric power on, *318, 357, 698
Feed pumps, Driving. By Gildersleeve, 33
Feed-water. (See Boilers.)
Ferro-silicon from carborundum, 922
Field coil windings, Rapid calculation of. By Hanchett, 482
Films, Disruptive voltage of thin liquid. By Shaw, (D.) 813
Finzi, George, Sketch of, *79
Fire fighting, Electricity in. By Moltke, (D.) 145
Fires, Electrical, 208, 797
——Electric vs. other hazards, 1023
——Ohio fires in 1905, 1028
Flatirons, Electric:
——Advertising, *46
——Campaign in New England community. By Davidson, 670
——"Coming" flatiron, *244
——Crisis of the season, 203
——Grinnell, Iowa, 674
——Results of summer campaign, 833
——Western enterprise, 292
——Wiring for, *24
Flour, Alsop process of ageing, *1126
Flour mills, Electric motors in, (D. R.) 963
Fluorescence, Theory of. By Woker, (D.) 101
Flush receptacle, Harvey, *1124
Fly-wheels, Motor-generator. By Ilgner, 962
Foreign commerce of U. S., 166
Franchises, Relations of cities to, 634
Fuel:
——Briquette, in Europe, 449
——Burning cheap, 420, 422, *656
——Burning low-grade. By Hobart, 28
——Burning of washer slate and coke braize. By Atwater, *659
——Drawbaugh invention, 168
——Gaseous fuels, Use of. By Juptner and Nagel, (D. R.) 721
——Parson system of burning cheap fuel, *855
——Storage and handling of. By Dixon, (D. R.) 676
Furnaces:
——Balance-draft gas-producer, *575
——Improving service of hot-air. By Jewett, 1024 *1067
——McClave shaking grate, *656
Furnaces, Electric:
——Annealing and hardening. By Cohn, (D. R.), 494; (D.) 1161
——European furnaces, 910
——Future of. By Hutton, (D.) 1252
——Induction furnace for electrolysis of fused electrolytes, 923
——Induction furnace in Sweden. By Ibbotson, (D.) 614
——Laboratory work. By Tucker and Watts, (D. R.) 182
——New patents, 139
——Steel hardening and annealing, (D.) 1161
——Steel manufacture discussed by John Harden, 1140
——Vacuum furnace. By Arsen, (D. R.) 294
Fuse box on cross arm, *25
Fuse plugs:
——Faulty. By Stratton, 1060
——Plugs for 250 volts, *1166
Fuses:
——Fuses on secondary circuits, 157
——Union enclosed, *1008

## G

Galvanometer test set, Portable, *454
Galvanometers:
——Alternating-current D'Arsonval. By Franklin and Freudenberger, 550, 569
——Ballistic. By Wilson, (D.) 614
——D'Arsonval, Most effective design of, 981
——D'Arsonval, Factors determining design of, By Freudenberger, *959
——Dead points of needle for transient currents. By Russell, (D.) 574
——Factors determining design of needle. By Freudenberger, 607
——Kelvin type of suspended needle, 589
——Moving-coil. By White, (D.) 1006
——New type of alternating-current. By Franklin and Freudenberger, *718
——Precision measurements with ballistic. By Zeleny, (D.) 965
Garvin Machine Co., 1165
Gas:
——Price in England, 167
——Producer gas. By Schoettler, (D. R.) 1250
——Production, 1230
——Statistics on use of, 361
——Theory of producer gas. By Nagel, (D. R.) 1207
Gas analysis for steam users. By Kershaw, (D. R.) 1119, 1207
Gas arc lamps, 754
Gas engines:
——Blast furnace. By Hubert and Westgarth, (D.) 336
——Boston Elevated Ry. Co.'s power stations, 751
——Buckeye suction producer, *452
——Competition with electric motors, 488
——Economy. By Welch, (D. R.) 536
——Efficiency. By Bibbins, 140
——Electric driving with. By Atkinson, (D. R.) 249
——Ignition, Electrical. By Springer, *995, *1110, *1242

*indicates illustrated articles.

Gas mantles, Radiation from incandescent. By Swinburne, (D.) 535; 1231
Gas power. By Dalby, (D. R.) 612
Gas producer, Suction. By Tarr, *52
Gas producer plants:
——Iola Portland Cement Co., 1254
——Keene, N. H., *1051, 1053
——Operation and care of. By Dow, *865
——Suction gas plants, (D.) 99
Gas turbine development. By Becq, (D. R.) 377
Gases, Internal friction of. By Pederson, (D.) 337
Gasoline lighting permits, 944
Gauge tester, Dead-weight, *56
General Electric Co., 56
General Electric Co.'s strike, 1232
General Electric—Westinghouse compact, Decision on, 396
Generators:
——American Ball, 1081
——Bearings. By Livingstone, (D.) 534
——Columbus trolley sub-stations, *729
——Connection of equalizer bus, 37
——Design of shafts. By Livingstone, (D.) 376
——Drop in voltage, Remedy for, 431
——Gas engine-driven, *679
——High-speed electrical machinery. By Thompson, (D.) 811
——High-speed and high-voltage direct-current dynamos. By Hobart, (D.) *141
——Mechanical design of. By Livingstone, (D.) 491, *611
——Milch constant-current, *1186
——National motor-generator, *730
——Oerlikon turbo-generator, (D.) *247
——Parallel operation of, 235; by Prescott, *665
——Polyphase current diagram. By Niethammer, (D.) 675
——Single-phase currents from three-phase supply. By Still, (D.) 1120
——Single-phase magnetic fields. By Lamme, (D.) 675
——Thermo-electric. By Heil, (D.) 811
——Tirrill dynamotor, *276
——Turbo-generators, Construction of four-pole. By Rosenkoetter, (D.) 962
Geological survey hydrographic work, 1225
German Association of Electrical Engineers, 50, (D.) 338
German electrical and machinery industry, 637, 1184, 1188
Glass of low resistivity. By Phillips, (D.) 495
Glazebrook, R. T., 122, 1097
Globes, Lamp, Frosting of. By Solomon, (D.) 98
Gold, Electrolytic precipitation of, from Cyanide solutions. By Neumann, (D.) 378
Gold and silver refining. By Tuttle, (D.) 337
Goodwin & Kintz Co., 682
Governors, Water wheel, *450, *683
Grate, McClave shaking, *656
Greenwich Observatory, (D.) 183
Gregory Electric Co., *885
Griffiths' presidential address, (D.) 537
Ground return, Electric railway, 743
Grounded neutral in a high-tension plant. By Ricker, (D.) *676; Thomas, (D.) 677
Grounding caused by dust. By Bailey, 1061
Grounding of transformer secondary systems, 391
Gutta-percha, Temperature coefficient. By Winnertz, (D.) 1251

## H

Hangers, Electrolier and conduit. By Poppe, *30
Harmonics produced by armature teeth. By Simons, (D. R.) 336
Harvard Medical School, 596
Harvard University, Applied science at, 701
Hatches, Electrically operated, *379
Haulage plant, Exhaust steam-driven, three-phase. By Maurice, (D.) 142
Heating, Electric:
——Deficiencies in the heating field, 393
——Development of, 487
——Residence electric heating. By Ayer, 416
——Three-cent rate at Ludington, Mich., 1066
——Toledo, Ohio, 418
Helderberg Cement Co., 887
Hoist, Single-phase builder's, *889
Hold Fast Lamp Guard Co., 615
Holes in iron made by means of electric arc, 669
Helophane clusters, *885
Holtzer-Cabot Electric Co., 728, 888
Hubbell, Harvey, 1124
Hypochlorites for disinfection (D. R.) 49
Hysteresis:
——Alternating-current motors. By Niethammer, (D. R.) 676
——Hysteresis exponent experimentally determined. By Weber, 590, *609

## I

Illinois State Electrical Association, 589, 594, 649
Illuminating Engineering Society, 9, 80, 161, 592, 638, 744, 945, 946, 1141
Impregnating field and armature windings, *54
Incandescent lamp brackets, *1008
Incandescent lamp clusters, Benjamin, *931
Incandescent lamp clusters and bowls. By Cravath and Lansingh, *1037
Incandescent lamp fixture, Adjustable, *496
Incandescent lamp guards, Adjustable, *496
Incandescent lamp tester. By Kavanagh, *666
Incandescent lamps:
——American vs. foreign. By Willcox, 293
——Assorting, according to age. By Sharp, 18
——Cavello, *474
——Chemistry of new lamps. By Boehm, (D.) 534
Incandescent lamps: (Continued.)
——Colloids. By Lotter-Moser, (D. R.) 98
——Cost of lighting with different lamps. By Teichmueller, (D.) 721
——Development, 489, 511
——Frosting of globes. By Solomon, (D.) 98
——Frosting and coloring, 1064
——Grading of voltages. By Preece, (D.) 535
——High efficiency, 486
——High efficiency. Measurements on temperature and selective radiation of lamps. By Waidner and Burgess, 903, *915
——Iridium lamp. By Boehm, (D.) 493
——Low vs. high voltage. By Roberts, 675
——Mean horizontal intensity, Determination of, by the rotating lamp method. By Hyde and Cady, 943, *956
——"Mill type," *297
——Osmin lamps, 201
——Osram lamps, (D.) 48, 336, *492, *552
Comparative tests. By Uppenborn and Lux, (D.) *876
Welsbach Co. of Berlin, (D.) 962
——Present status of, 717
——Protection from influence of static machine, 37
——Renewals, 874
——Rooney, for weatherproof circuits, *339
——16 candle-power, out of date, 631
——Standards. By Don, (D.) 723
——Tantalum lamp:
Cost of lighting with, 834
Discussion of. By Steinmetz, 1022, 1041, 1095; Sharp, 1021, 1029, 1095
European prices, 9
Life of, (D.) 493; 1102
N. Y. Edison, 753
Price of lamps. By Kennard, 1159; Willcox, 1250
Tests. By Good, (D.) *48
——Tests of lamps. By Spinney, 1137, 1149
——Transformation of electric power into light discussed by Steinmetz, 1022, 1041, 1095
——Tungsten lamp, (D.) 98
Comparative tests. By Uppenborn and Lux, (D.) *876
Discussion of. By Sharp, 1021, 1029, 1095; Steinmetz, 1022, 1041, 1095
Effect on the art of lighting, 353
General Electric, 319, 394
Heany lamp, 495
Properties of filaments, 389
Westinghouse interests, 537
Wolfram lamp, *447
——Zirconium lamp. By Boehm, (D.) 492; (D.) 1118
